

Comunicat AR - VideoCube 20210405

In weekendul 05.12.2020, acoperisul de la Arena Nationala a fost inchis de catre operatorii numiti de proprietarul Arenei Nationale. Operarea s-a efectuat contrar restructiilor de anotimp, conditii meteorologice impuse de catre producator. La operatiunea de deschidere, pe data de 07.12.2020, s-au rupt cablurile de la acoperis, astfel blocand acoperisul in pozitia intermediaara.

AUROCON Romania a fost anuntata de problemele de la acoperis in data de 10.12.2020. Pe data de 11.12.2020, o delegatie a AUROCON s-a deplasat la Arena Nationala, constatand ca acoperisul este in pericol de prabusire din cauza acumularilor foarte mari de apa.

Din data de 11.12.2020 pana in data de 23.12.2020, AUROCON a efectuat lucrari de evacuare a apei de pe acoperis, lucrari de fixare, reparatii si parcare a acoperisului in pozitia de mijloc – deschis. Operatiunile s-au efectuat dupa discutii verbale si acordului de executie, scris din partea PMB.

De atunci pana astazi PMB nu a reusit sa finalizeze procedurile pentru plata lucrarilor efectuate. Mai mult, pe data de 14.02.2021 PMB a anuntat ca nu intentioneaza sa finalizeze procedurile pentru plata sau pentru un contract direct.

De la inceputul lunii Martie 2021, AUROCON Romania a fost abordata de diferite institutii (PMB, CMTIB, Comitetul de Organizare EM 2021, UEFA, FCSB Bucuresti etc.) in vederea solicitarii de accordare ajutor pentru operarea videocubului de la Arena Nationala.

AUROCON a refuzat orice interventie pentru operare in Arena Nationala, din cauza lipsei bazei legale, adica acordul cu proprietarul acoperisului.

Mentionam ca AUROCON nu are responsabilitati fata de Arena Nationala, nu a avut si nici nu are un contract de mentenanta. Din contra a mentionat cu repeatate ocazii problemele tehnice care pun in pericol operarea in siguranta a acoperisului.

Communiqué - VideoCube 20210405

During the weekend of 05.12.2020, the roof of the National Arena was closed by the operators appointed by the owner of the National Arena. The operation was carried out contrary to the seasonal and meteorological restrictions imposed by the manufacturer. During the opening operation, on 07.12.2020, several cables from the roof were broken, thus blocking the roof in the intermediate position.

AUROCON Romania was informed about the problems on 10.12.2020. On 11.12.2020, a team from AUROCON went to the National Arena, finding that the roof is in danger of collapsing due to very large accumulations of water.

From 11.12.2020 to 23.12.2020, AUROCON performed works such as evacuation of water from the roof, fixing the roof in safe position, repairing and parking the roof in the middle - open position. The operations were carried out after verbal discussions and after written instruction to start with executions of the works sent by PMB.

From then until today, PMB has not been able to complete the procedures for payment for works performed. Moreover, on 14.02.2021 PMB announced that it is not intended to complete the procedures for payment or for a direct contract.

Since the beginning of March 2021, AUROCON has been approached by various institutions (PMB, CMTIB, Organizing Committee for EM 2021, UEFA, FCSB Bucharest etc.) in order to request assistance for the operation of the video cube from the National Arena.

AUROCON is not able to perform any intervention for operation in the National Arena, due to the lack of legal basis, such as an agreement with the owner of the roof.

We mention that AUROCON has no responsibilities in relation with the National Arena, did not have and does not have a maintenance contract. On the contrary, AUROCON Romania repeatedly mentioned the technical problems that endanger the safe operation of the roof.
